\$0 COPAY Prescription Program (Mail-Order)

Your questions answered...

I just realized I am taking a prescription offered through CRX International. What are the next steps to start getting it filled through this program?

The easiest and quickest way to get started is to go directly to the website www.crxintl.com using WebID **OCCC** and enroll online. You can upload a copy of your photo ID using the secure upload. There is even an option to ask the CRX team to reach out to your physician's office for a prescription!

The other option is to submit a hard copy of the enrollment form (available for download on the website). This can be mailed or faxed to CRX, along with a copy of your photo ID. Include the original prescription or have your physician's office fax a prescription directly to CRX (faxed prescriptions are only accepted when sent from the physician's office).

I have a new prescription, can it be requested through CRX International?

If you have a new prescription, one of the requirements is that you fill it for at least 30 days through a local provider. This ensures that you know how to properly take the medication and that the strength and dosage works before receiving a 90-day supply.

After the 30-day trial, you can begin ordering through the CRX International program.

I am a new hire and want to get my prescription through CRX International, what steps do I have to take?

Once you qualify for coverage under the health plan, follow the steps above.

For assistance or more information call CRX International (toll free) at 1-866-488-7874.
