*****The above costs are subject to change*****

EXPLANATION OF COSTS:

Oklahoma Resident Tuition and Fees:

The approximate tuition is for students who need to take all courses required for graduation with the Associate in Applied Science Degree. If a student has previously taken general education coursework, that transfer, this amount is incorrect. The current cost for residents is \$135.29/credit hour. Non-Resident Tuition and Fees: \$326.99/credit hour.

Application Fee: \$20 selective admission application fee for OTA applicants

Book costs are approximate and will vary depending on the location of purchase. Books will be an excellent resource throughout the career of the licensed COTA.

OTA student liability insurance: The est. student liability insurance fees must be paid annually each fall at the Bursar's office. The insurance will cover the student in lab and while on clinical rotation. The student will not allowed to participate without insurance.

OTA Supplies: These supplies are provided in a kit and include lab supplies such as goniometers, gait belts, and Hip Kits. These supplies are presented to students at the beginning of the lab courses.

AOTA and OKOTA Dues: Joining the AOTA and OKOTA is voluntary but strongly encouraged. The students will gain valuable resources such as publications, full-text articles online, employment searches, networking opportunities and professional resources.
